AI Tender Response System

Technical Tender Requirements

1. Project Overview

The client requires the development of an AI Tender Response System to assist in preparing technical proposals.

2. Technical Requirements

- The system must support PDF document processing.
- The system must extract and analyze tender requirements.
- The system must retrieve relevant information from indexed documents.
- The system must generate a technical proposal based on the tender requirements.

3. Delivery Deadline

The project must be delivered within **30 days**.

4. Proposal Requirements

The technical proposal must describe the proposed solution, implementation approach, and delivery timeline.
